

K-LOVE serves me by positive communication during the day in my workplace. This positive encouragement adds to a positive workplace environment. If K-LOVE were to be displaced I would not be able to have positive encouragement during they day. Our society needs positive encouragement on the airways, it helps individuals stay positive, I believe this type of programming also serves as public interest to reduce workplace violence because of the positive encouragement that is given on the boardcast. Please consider leaving the airways as they are and do not give LPFM a priority over FM translator service.
